Plan W21125DR: Walls of Windows

House plans are Copyright © 2009 by our architects and designers.

- Magnificent windows adorn the front of this four-season contemporary house plan. An expansive deck on the second level extends outdoor living.
- On the second level, a see-through fireplace can be enjoyed from both the dining room and the bayed living room with a sloped ceiling. An island snack bar separates the kitchen from the rest of the space.
- Completing the first floor are a guest room, a full bath off the hall, and a master suite with a private bath.
- Downstairs, you find a fireplaced family room. Two more bedrooms share a hall bath, and another room could be either a laundry room or a study. A bonus room enables more flexibility.
- Ceilings: 8' standard.
