Plan W33505EB: High Tower Entryway

House plans are Copyright © 2009 by our architects and designers.

- This single story home plan uses classic exterior details to give it an old world flavor. A high tower entryway that is wrapped in keystone detailing creates a pleasing streetscape. The stucco finish, round columns, and louvered window openings provide a glamorous touch to the front.
- Inside the double doors, the open flow is felt in the formal living spaces. High stepped ceiling details and walls of windows keep the rooms airy.
- The wet bar passes through to the family living areas. Here a nice size kitchen has ample storage and workspace.
- The leisure room faces the covered veranda and rear views through corner sliding glass doors.
- The master features a his and hers walk in closet, dual sinks, a huge shower, and a nice sitting retreat.
- Two full guest suites with private baths and a bayed study round out this home.
