Plan W43016PF: Timber Framed Craftsman House Plan

House plans are Copyright © 2009 by our architects and designers.

- The timber framed porch and exterior finish of this true craftsman-style home plan are truly delightful.
- Upon entering the craftsman house plan, a cathedral-like timber framed interior fills the eye.
- Warm woods of all species enhance the great room and kitchen.
- To the right of the entry, a cozy formal dining room opens to the wrap-around porch.
- To the left is the master bedroom with a sloped ceiling adjoining a luxurious master bath with twin walk-in closets that opens to a sunroom with a private balcony.
- The second floor has an open lounge that leads to two bedrooms with vaulted ceilings and a generous second bath.
- This house plan is a timber framed home sheathed with structural insulated wall and roof panels. It is amazingly energy efficient.
- The plans have two foundation plans; one for structural insulated panels and one for conventional poured concrete.
