

## Plan W50002CZ: Lots of Storage Space

House plans are Copyright © 2009 by our architects and designers.

- Gables and high windows accent the front elevation of this ranch home plan, while in back transom windows let light into the great room and breakfast room.
- A sauna in the main-floor master suite offers a terrific relaxation opportunity. A computer desk adds utility to the kitchen, and an optional cathedral ceiling in this area and the breakfast room adds volume.
- There is also a walk-in pantry and island with snack bar in the kitchen.
- Downstairs, two bedrooms share a bath; a third bedroom is close to the other full bath.
- The recreation room and large storage area with root cellar complete the lower level.
- Ceilings: 9' first floor.
- Foundation: daylight basement.
