

Plan W69402AM: Single Story Contemporary House Plan

House plans are Copyright © 2009 by our architects and designers.

- This stunningly original contemporary house plan home brings a chic sensibility to one level living. A long gallery separates the home's spaces, nearly all of which feature vaulted ceilings.
- Gorgeous, angular windows abound as do built-ins. A back porch off the great room and master suite ensures that leisure time unfolds as seamlessly as this home's design.
- In addition, a three car garage, lighted niches, a wet bar, a unique kitchen island with vaulted nook and extended, built-in plant shelves all punctuate the quality craftsmanship and modern design of this truly singular residence.
- Related Plan: Gain a finished lower level with house plan 69113AM.
