Plan W48026FM: Majestic European Home Plan

House plans are Copyright © 2009 by our architects and designers.

- This majestic European style house plan makes a bold yet refined statement in any neighborhood. The beautiful stonework and various roof peaks create an original masterpiece.
- There are four fireplaces - one in the study with french door entry and built-in bookcases, one in the massive great room with built-ins, one in the master suite and one in the outdoor living area.
- The great room has a wall of windows overlooking the outdoor living area with a built-in grill. It is also open to the kitchen and breakfast nook. The nook opens to the outdoor living area. For holiday meals, you have the formal dining room that lies off the two story foyer.
- The grand master suite has its own private covered patio - a wonderful feature that expands the living area while creating a private hideaway. Built-in bookshelves help de-clutter the room. The master bath is a dream with a massive walk-in closet with built-in dressers, a spa tub and walk-in shower.
- Upstairs, three bedrooms with sloped ceilings each have their own walk-in closets. A large bonus room completes this beautiful European-style home plan.
