Plan W5092CZ: Southwest Design With Outdoor Fireplaces

House plans are Copyright © 2009 by our architects and designers.

- Outdoor fireplaces add warmth to the courtyard of this Southwestern home plan and to the private patio off the master suite. Another fireplace is found in the great room, while a grill on the covered rear veranda is wonderful for entertaining.
- Nicely isolated, the master suite includes a spacious walk-in closet and a bath with a garden spa tub and his and her vanities.
- On the other side of the house, identically sized secondary bedrooms share the other full bath.
- The formal dining room opens to the courtyard via French doors. The rest of the living area is open, and French doors in both the great room and breakfast room access the veranda.
- Ceilings: 10' master bedroom

Style: Southwest

Total Living Area: 1841
