Plan W81027W: Gothic Victorian Style House Plan

House plans are Copyright © 2009 by our architects and designers.

- Reminiscent of the Gothic Victorian style of the mid-19th Century, this delightfully detailed, three-story house plan has a wraparound veranda for summertime relaxing.
- A grand reception hall welcomes visitors and displays an elegant staircase. The parlor and family room, each with a fireplace, provide excellent formal and informal living facilities.
- The well-planned kitchen is only a couple of steps from the dining and breakfast rooms. Access to the rear terrace is provided through the family room or the breakfast room.
- The second floor has four bedrooms and two baths plus a sewing room or a study. The third floor houses an additional bedroom or a studio with a half bath, as well as a playroom--a real bonus of livability.
