Plan W5622AD: Country French

House plans are Copyright © 2009 by our architects and designers.

- With its blend of stucco and stacked stone, this French country home plan presents a unique architectural motif. Attractive arches and sweeping roof are the home's signature.
- Flanked by a spacious dining room and a study accented by its vaulted ceiling and fireplace, the foyer leads back to the two-story great room, also with a vaulted ceiling and a fireplace. Here a full wall of glass brings the outdoors inside.
- Adjacent to the great room is the bayed breakfast area, which, with its volume ceiling and generous use of windows, makes it feel like a sunroom extension of the large kitchen.
- The first floor master suite with a tray ceiling in the bedroom, provides the ultimate in privacy and convenience while the large accommodating bath offers separate vanities and individual closets. Upstairs are a bath and three more bedrooms, one with its own balcony.
