Plan W40841DB: Special Master Suite

House plans are Copyright © 2009 by our architects and designers.

- A wonderful master suite is featured in this Craftsman design, where sturdy columns support the front porch.
- The foyer leads back to the great room with its fireplace flanked by windows. The great room is open to the morning room.
- A central island and a pantry closet are extra features of the kitchen, which is conveniently close to the laundry room.
- In the master suite, note the tray ceiling in the bedroom, the separate sitting area, the walk-in closet and the garden soaking tub in the bathroom. Bedroom two uses the other full bath.
- NOTE: This house plan is designed for Structural Insulated Panel (SIP) construction. See plan 4114DB for the 2x4 version of this home plan.
