

Plan W69022AM: Single Story Home Plan

House plans are Copyright © 2009 by our architects and designers.

- This one-story house plan makes efficient use of a moderate footprint and is adorned with special details such as a covered porch, shuttered windows and a sidelighted entry. The interior also contains a wealth of amenities that make this home a standout.
- Both the great room and the master salon are vaulted. The great room has a beamed ceiling and a fireplace flanked by windows overlooking a vaulted porch.
- Look for a built-in desk in the kitchen and built-ins or a hutch recess in the dining area. The den opens through double doors and has an optional built-in desk or closet.
- Two full baths in the house plan include a compartmented master bath with spa tub, and a bath shared by Bedrooms 2 and 3. Bedroom 3 features built-in shelves; Bedroom 2 has an arched window.
- A large shop area adds to the convenience of the two-car garage. Reach the garage via an entrance in the laundry room.
